Comments from Emelia Wheeler

We add an additional 10% estimate per quote to cover necessary basic replacement parts. If the repair costs approach 50% of the replacement value, we'll contact you before proceeding. PLEASE SPECIFY IN SPECIAL INSTRUCTIONS SECTION OF SERVICE FORM IF A REPAIR QUOTE IS NEEDED.

Our Pipette Calibration Services are conducted gravimetrically using Grade 3 purified water, equipment manufacturer or validated substitute tips, and ISO8655 compliant test equipment traceable to NIST. Preventative Maintenance is performed during every service unless otherwise instructed by the customer.

We also look for your special instructions we receive from you on our required Calibration Service Form. Links to these forms were included in the email that included this quote. This quote serves to clarify pricing only, not to direct our lab on your requested services.

Your UPS Ground return shipping cost is not quoted. Expedited shipping is a rough estimate. When you submit your pipettes for service, indicate your shipping preferences on your service form. We will add the cost to the invoice.

Have other pipettes? Your organization may qualify for Service Volume discounts. Inquire with your sales representative.
